

## Digital Compression Testing Machine

### YES-2000

YES2000 electro-hydraulic compression testing machine adopts hydraulic power source drive and intelligent measurement and control instrument to collect and process experimental data. The maximum experimental force is 2000kn, and the accuracy level is better than one level. It fully meets the experimental requirements for cement, brick, concrete and other materials. It is manually loaded, and the value of the loading force and the loading speed are displayed in numbers.

Model	YES-2000
Item Name	Compression Testing Machine
Maximum test force (kn)	2000
Test accuracy	Level 1
Compressed space (mm)	360
Upper platen size (mm)	240*240
Lower platen size (mm)	240*240
Motor power (kw)	0.75
Mainframe dimensions (mm)	900×400×1250
Machine weight (kg)	650
Piston stroke(mm)	90
Power (KW)	0.75
Noise	<80DB

## PACKING LIST

ITEM	QTY
Digital display controller	1
Micro printer	1
Host	1
Hydraulic Controller	1
Protection net	1
Control knob	2
Pressure plate	2
English manual	1
Quality Certification	1
